Our Mission

The **Global Public Policy Institute (GPPi)** is an independent think tank based in Berlin and Geneva.

Our mission is to develop innovative strategies for effective and accountable governance and to achieve lasting impact at the interface of the public sector, business and civil society through **research, consulting and debate.**

Our Approach

- **We are an independent and non-profit institute.** We receive project funding from foundations as well as our project partners and clients from the public and private sectors. We re-invest profits from consulting activities into our research work.
- **We build bridges between research and practice.** Our team combines research and public policy expertise with practical consulting skills. We foster the exchange of knowledge and experience between researchers and practitioners.
- **We promote policy entrepreneurship.** Our work strengthens strategic communities around pressing policy challenges by bringing together the public sector, civil society and business.
