PROMOTING EFFECTIVE AND ACCOUNTABLE GOVERNANCE

www.gppi.net

OUR MISSION

The Global Public Policy Institute (GPPi) is an independent think tank based in Berlin and Geneva. Our mission is to develop innovative strategies for effective and accountable governance and to achieve lasting impact at the interface of the public sector, business and civil society through **research, consulting** and **debate**.

OUR APPROACH

We are an independent and non-profit institute. We receive project funding from foundations as well as our project partners and clients from the public and private sectors. We re-invest profits from consulting activities into our research work.

We build bridges between research and practice. Our international team combines research and public policy expertise with management consulting skills. We foster the exchange of knowledge and experience between researchers and practitioners.

We promote policy entrepreneurship. Our work strengthens strategic communities around pressing policy challenges by bringing together the public sector, civil society and business.

OUR WORK

RESEARCH

GPPi is committed to high-quality research on governance. Our topics include the effectiveness and accountability of international organizations, public-private partnerships, corporate social responsibility, and the roles of business and civil society in global governance.

GPPi has received research grants from the German Foundation for Peace Research (DSF) and the Fritz-Thyssen-Foundation, among others. We have prepared research studies for the UN Global Compact, the UN Environment Programme, the Overseas Development Institute, and the Alfred Herrhausen Society for International Dialogue.
